

UCLan's Student Centre construction video transcript

First image shows the early stages of the construction with the text 'the first steel is being erected on the new student centre'.

The second image is panning down the steel frame with the text 'it will include 1,520 pieces of steel totalling 450 tonnes and will be 16.5m high.

The third image has a crane in front of the steel frame with the text 'work is being carried out by our contractor Bowmer and Kirkland'.

The fourth image shows a busy construction scene with the text 'the student centre will form part of the new 8,440 square metre landscaped square'.

The fifth image is panning around a steel frame with the text 'the project is on schedule to open in early 2021'.
